# SEED GRAIN—Offerings and Prices

## —PEDIGREED SEEDS—

### “HUMCO” APPLER 294-60 STRAIN 4 SEED OATS

The finest Pedigreed Appler Seed Oats to be found. **Smut-Cold-Rust Resistant**. A combination of qualities that can't be bettered. This Oat has made more **High Yields** than any Oats we know of in the South.

### “HUMCO” FULGHUM 106-440 STRAIN 4 SEED OATS

These Oats are not smut resistant 100%, but have some resistance. Our seed treated with New Improved Ceresan and smut free. This Oat **Cold Resistant** and finest Oats we know for planting with vetch for Spring Hay. Its seed yield is very good.

### “HUMCO” ABRUZZI 226-80 STRAIN 3 SEED RYE

#### Our Latest Strain Seed Rye

Its production record is very high in seed, and makes excellent vigorous straw growth, so that it is highly adapted as a grazing or green manure crop for winter growing.

Our seed are **Heavy**, thoroughly **Recleaned** and **Finest Quality** in every way.

See Price List for Prices

“HUMCO” APPLER 294-60 Seed Oats  
**COLD—SMUT—RUST** Resistant

## —SELECTED SEEDS—

**Note:** These are seed **First** and **Second** years from breeders, which we have grown on our farms, or had grown for us, under our supervision. **We Know Them** and **Guarantee Them** to be **pure**, **clean** and of such **high quality** as to guarantee entire satisfaction to all who plant them.

### FULGRAIN 33-19 STRAIN 2 SEED OATS

A **Smut** and **Cold Resistant** Oat. It makes small growth of straw and very heavy seed yields. It comes off very early and is a fine Oat to plant for high seed yields. It is a large grain, beardless Oat.

### REDHART STRAIN 3 SEED WHEAT

This is a high yielding, beardless variety, resistant to **Loose Smut** and **Rust**, and has made excellent yields throughout the Southern states.

### V. P. I. NO. 131 SEED WHEAT

A Rust Resistant Strain developed from the Fulcaster wheat. It produces well and is a bearded variety. It is a safe wheat to plant.

### ABRUZZI SEED RYE

**No Rye** in the **South** has given as high yields of seed and forage as has Abruzzi.

Our **SELECTED SEED Stocks** are from high yielding strains that are pure and free from weevil damage.

See Price List for Prices

# COTTON SEED

PEDIC

## "HUMCO" DIXIE-TRIUMPH 251

### STRAIN 1

**WILT RESISTANT—ESPECIALLY ADAPTED FOR HEAVY LANDS.**

#### DESCRIPTION:

It's—A small growing cotton.

Its—Foliage is light.

Its—Season is very early.

This is our first Strain of Dixie-Triumph Cotton of small, dwarfy type and recommended for rich lands.

Its—Bolls are large.

Its—Staple is 1 1/32 inch full.

Its—Turn-out is 38%.

## "HUMCO" DIXIE-TRIUMPH 251-112

### STRAIN 2

#### A NEW STRAIN

We have tried for years to get a **NEW STRAIN** of the Dixie Triumph better than our Dixie Triumph 251. **THIS IS IT. IT'S BETTER BY 35 LBS. LINT PER ACRE.** It has better **STAPLE, 1 1/16".** **IN OUR OPINION THIS IS THE BEST DIXIE TRIUMPH** to be had. Lint Turn-Out 38%; Bolls 65 per lb. seed cotton. Foliage light and **WILT RESISTANCE VERY STRONG.** This cotton can be depended upon to live and produce maximum crop on Wilt Lands.

Seed Stock Small—Book Early

#### WARNING

We do not guarantee any Wilt Resistant Cotton Seed. Any seed will die some on bad rootknot infested lands. Our Wilt Resistant Cotton Seed as good as can be had.

DIXIE TRIUMPH 251-112  
STRAIN 2

## "HUMCO" FOSTERWILT 13-46—Strain 1

### (WILT RESISTANT)

This variety of cotton has been grown in a large way for the past two years with excellent results. In 1939 yields were made of 1½ and 2 bales per acre by several growers who have reported to us. **ITS** staple runs from 1 1/8" to 1 5/32" and is a very popular length with buyers and mills. Its **TURN-OUT** of lint runs 35%. Has large bolls, light foliage, grows medium in size and is highly adaptable on good or poor lands. This cotton will bring 1 to 2 cents a pound more than regular short cotton and will add dollars to your farm profit.

**IT'S AN EARLY MATURING COTTON—EASY TO PICK, WITH LARGE OVATE BOLLS** that open wide. **IT TAKES ONLY 60 Bolls** to make a pound of seed cotton. Yield 627 pounds lint our farm 1939.

See Price List for Prices

Row 1

Row 2

Fosterwilt shows strong wilt resistance and heavy production on bad wilt lands. Row 1, Fosterwilt; Row 2, Carolina-Foster. (Check.)

## "HUMCO" CAROLINA-FOSTER 13-52-6

### STRAIN 2

AN EARLY, LIGHT FOLIAGE, HEAVY PRODUCING, SHORT STAPLE Cotton. THIS COTTON HAS NO SUPERIOR in its class. Staple  $1\frac{3}{32}$ " Full; Bolls 70 per pound Seed Cotton; Lint Turn-Out 36%. For lands that carry no wilt it is the safest cotton and highest **DOLLAR VALUE** per acre cotton we have grown. It grows small and is highly adapted to heavy lands. Due to its light foliage and quick hardening of the bolls, it will stand more bad weather and weevil infestation and make good yields than any cotton we know. **THOSE WHO PLANT THIS COTTON HAVE BEST INSURANCE AGAINST CROP FAILURE.**

NEAR THE COAST, where rain fall is heavier, or for **NORTHERN LIMITS** of cotton belt where an **EARLY** cotton is essential, this is A **VERY VALUABLE COTTON.**

See Price List for Prices

## "HUMCO" CAROLINA-FOSTER 7-156

### STRAIN 11

(SEMI-WILT RESISTANT)

This is a **NEW STRAIN.** Has shown 31 pounds lint per acre more than the Strain 10. Has light foliage, open type, nice large bolls. Its **WILT RESISTANCE** is good but will not stand 100% on worst wilt lands. Just the cotton for lands with light wilt infestation. Its Staple  $1\frac{7}{32}$ "; Lint turn-out  $33\frac{1}{3}\%$ . 65 bolls per pound Seed Cotton. Production our farm 1939, 571 pounds lint per acre.

**ON SOME LANDS,** where real light foliage cotton is needed, and where **WILT JUST BEGINNING TO SHOW UP,** THIS COTTON will be **VALUABLE.**

This **FIRST** Old Type Carolina-Foster we have offered with any **WILT RESISTANCE.**

TWO ROWS CAR.-FOSTER 13-52-6—STRAIN 2

NOTE

1. Small Type—Open Growing Plants.
2. Close-Fruiting.
3. Heavy Production.

## "HUMCO" CAROLINA-FOSTER 13-16

### STRAIN 10

AN EXCELLENT STRAIN of OLD TYPE Carolina-Foster Cotton. It has many **Superior Characters**, but Its **Earliness** and **Light Foliage** give it **High Yielding Power**, in spite of Boll Weevils and bad weather conditions.

**WE HAVE NEVER OFFERED A MORE SUPERIOR STRAIN OF CAROLINA-FOSTER COTTON FOR LANDS HAVING NO WILT INFESTATION.**

#### DESCRIPTION:

**Staple**— $1\frac{3}{16}$ " Full; **Boll Size**—68 per lb. Seed Cotton.  
**Per Cent Lint**—34%; **Production**—540 lbs. lint per acre our farm, 1939, under bad weevil conditions.  
**Lint Quality**—Fine Body and Character.

See Price List for Prices

REED

## COTTON SEED

**"HUMCO" CAROLINA-FOSTER 13-46-452**

**EXCELSIOR STRAIN 7**

**(SEMI-WILT RESISTANT)**

**A NEW STRAIN** of CAROLINA-FOSTER 13-46 with **LONG LENGTH STAPLE**, and **EXTRA LARGE BOLLS**.

**STAPLE**— $1\frac{1}{4}$ " Full; Per cent. **LINT**—33  $\frac{1}{3}$ .

**BOLLS**—58 to 60 per pound Seed Cotton.

**FOLIAGE**—LIGHT.

**PRODUCTION**—EXCELLENT YIELDER.

Since our Carolina-Foster 13-46, Strain 4, came out several years ago, we have had a hard time to get another Strain as good.

**THIS STRAIN 7** is slightly earlier, has made a little higher yield in comparative tests, and its staple is Full  $1\frac{1}{4}$  inch or better under good conditions. **IT'S GOOD—TRY IT.**

**THIS STRAIN** is **SEMI-WILT RESISTANT** and stands well on most lands. We do not recommend it for the worst Wilt Lands, but on those not heavily infested with Rootknot nematodes, it will give excellent satisfaction.

**"HUMCO" DELFOS 6102-38**

**STRAIN 6**

**ITS TYPE:**

**A Rapid Fruiting, Early, High Yielding, Open Growing, Light Foliage Cotton.**

**DESCRIPTION:**

1. **Staple**— $1\frac{3}{16}$  inch full.
2. **Lint Per Cent**—34% (including bagging and ties).
3. **Boll Size**—68 per pound seed cotton.
4. **Earliness**—Very Early. Its bloom record shows it **at the top** of any  $1\frac{3}{16}$  inch cotton yet offered by us.
5. **Yield**—**In Our Test**—A high yielder. Always among the best.
6. **Foliage**—Very Light. Its leaf area is much less than most varieties and will **let in** at least  $\frac{1}{3}$  more sunlight to the bolls. This extra sunshine hardens the bolls quickly and prevents weevil damage and boll rotting to a great extent. **This is Extremely Important.**

**A SAFE COTTON, WITH HIGH DOLLAR VALUE PER ACRE**

**See Price List for Prices**

**A  
TYPICAL  
ROW  
CAR.-FOSTER  
13-46  
(Excelsior Strain)**

### **NOTE—IMPORTANT**

**SEE OUR PRICE LIST** for other Strains and varieties not listed in this Circular. We offer several Strains of finest quality at bargain prices. For large plantings, where one has to buy all planting seed, these seed will save you much money and give you excellent results. Will be glad to send full information on any of these seed you are interested in.

# COTTON SEED

## "HUMCO" DELFOS 6102-38

### STRAIN 7

A NEW DELFOS COTTON—SEMI-WILT RESISTANT

Typical Rows—Delfos 6102-38, Strain 7

## SEED CORN

### "HUMCO" FULCROP WHITE-29

HIGH YIELD, NICE QUALITY, HIGH FEEDING VALUE AND STRONG RESISTANCE TO WEEVIL ATTACK are the outstanding characteristics of this variety.

#### Its Characters:

- |                                 |                                  |
|---------------------------------|----------------------------------|
| 1. One and two ears per stalk.  | 5. 87% corn to cob.              |
| 2. Large ears.                  | 6. Deep grains.                  |
| 3. Shuck covering very good.    | 7. Feeding value high.           |
| 4. Weevil resistance excellent. | 8. Color: white corn, white cob. |

IF YOU WANT A GOOD CORN THAT WILL MAKE A GOOD YIELD AND STAY IN YOUR BARN UNTIL THE NEXT CROP COMES IN—THIS IS THE VARIETY TO PLANT. NONE BETTER.

OUR SEED CORN is carefully nubbed by hand, shelled and recleaned and is the kind we plant ourselves.

PRICES: Bushel, \$3.50; 10 Bushels @ \$3.25.

#### SELECTED SEED CORN

We sell other varieties of Seed Corn such as: Latham's Double, White; Improved Golden Dent and others, either direct or first year from Breeders. Ask for prices, if interested.

## CHARACTERS

### "HUMCO" DELFOS 6102-38 STRAIN 7

#### ITS TYPE:

A Heavy Fruiting, Early, High Yielding, Extreme Light Foliage Cotton.

#### ITS CHARACTERS:

1. Staple—1 7/32".
2. Lint Per Cent—33 1/3 (with bagging and ties).
3. Boll Size—65 per lb. seed cotton.
4. Earliness—Very early.

#### SPECIAL ADAPTATION:

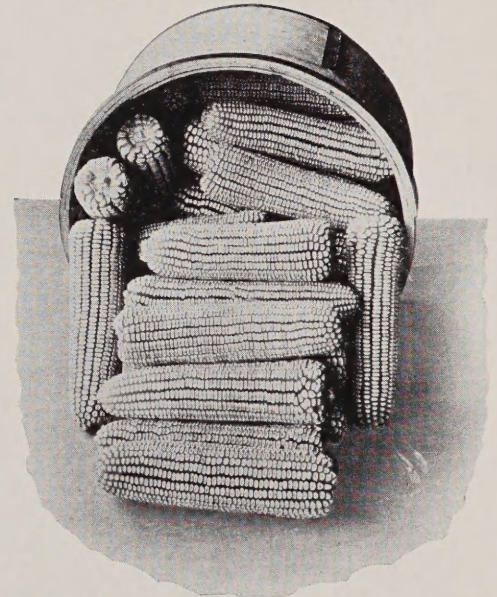

Its extreme light foliage adapts it for the strongest lands where the heavier foliage cottons are not suitable. Its wilt resistance makes it highly valuable.

"HUMCO" DELFOS 6102-38 Cottons are Making Exceptionally High Yields in Mississippi and Louisiana Delta Sections.

NOTE: AN IMPORTANT CHARACTER THIS COTTON.

IT'S SEMI-WILT RESISTANT. IT'S THE COTTON TO PLANT ON LIGHTLY INFESTED Wilt Lands.

See Price List for Prices

Typical Ears of Fulcrop Corn

# SELECTED SEEDS

## COTTON SEED
